

# Atmospheric Rivers: Recent Developments and Applications in California

Please join Dr. Marty Ralph, Director of the Center for Western Weather and Water Extremes at UC San Diego's Scripps Institution of Oceanography, for a discussion of a key phenomena behind California's record breaking water year. Dr. Ralph will discuss recent scientific advances related to the forecasting of atmospheric rivers and what these developments mean for the State.

**Tuesday, May 23, 2017, 11:00 am – 12:00pm**  
**Natural Resource Building Auditorium**  
**1416 Ninth St., Sacramento, CA 95814**

Please RSVP to Kristin Methlagl at [kmethlagl@ucsd.edu](mailto:kmethlagl@ucsd.edu)
